• The Charity Walk walk follows the recreation path around the Western end of Lake Burley Griffin as shown and is well supervised. There are a number of checkpoints as shown and supervision at many other points along the course.

• Items that walkers do not wish to carry any longer or lost property items may be left at any checkpoint where there will be facilities to handle them. They will be taken to the end point where they can be collected from the property table.

• Water top ups, Fruit, and Sweets are available along the course as shown on the map.

• There are four places where toilet facilities are available as shown on the map.

• At the end point at Acton Wharf the P&F will provide food for all students and staff. After lunch students are free to leave.

• Those students who are not being collected by parents will be supervised on their walk to Civic Interchange to catch public buses home. A shuttle service to Daramalan will carry those who wish to catch buses, particularly Deanes and Transborder, from school. Students taking buses from Civic Interchange are responsible for taking the correct bus and at their own expense.

• It is particularly important that walkers care for the environment during the walk by not littering and by not damaging structures or vegetation along the way.
